

Keeping the Home Safe

Encourage your employees to...

PRACTICE GOOD HYGIENE

- Clean hands at the door and at regular intervals
- Create habits and reminders to avoid touching their face and cover coughs and sneezes
- Disinfect surfaces like doorknobs, tables, and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning

HOUSEHOLDS WITH VULNERABLE SENIORS OR THOSE WITH SIGNIFICANT UNDERLYING CONDITIONS

- Significant underlying conditions include heart, lung, kidney disease; diabetes; and conditions that suppress the immune system*
- Have the healthy people in the household conduct themselves as if they were a significant risk to the person with underlying conditions. For example, wash hands frequently before interacting with the person, such as by feeding or caring for the person
 - If possible, provide a protected space for vulnerable household members
 - Ensure all utensils and surfaces are cleaned regularly

HOUSEHOLDS WITH SICK FAMILY MEMBERS

- Give sick members their own room if possible, and keep the door closed
- Have only one family member care for them
- Consider providing additional protections or more intensive care for household members over 65 years old or with underlying conditions
